PROFESSIONAL SUMMARY

Data Science and Political Science student with hands-on experience in data analysis, market research, and consumer research. Proficient in Python, SQL, and R, with project and internship experience analyzing business, financial, and higher-education data to identify trends, evaluate relationships, and communicate findings to non-technical audiences.

EDUCATION

The George Washington University

Bachelor of Science, Double Major in Data Science and Political Science

Relevant Coursework: Data Mining, Data Visualization, Data Warehousing, Programming with Python, Mathematical Statistics

Washington, DC

Expected Dec 2026

SKILLS

Programming and Data: Python, SQL, R, Neo4j, Cypher

Analysis and Research: Statistical Analysis, Data Analysis, Data Cleaning, Market Research, Consumer Research

Visualization: Data Visualization, R Shiny, ggplot2, Streamlit

EXPERIENCE

Marketing Associate Intern

Lono Inc.

Jun 2026 – Aug 2026

Seoul, South Korea (Hybrid)

- Conducted market, competitor, and consumer research across 30 competitor products to identify skincare trends, target audiences, and product positioning opportunities.
- Evaluated 10 potential influencer partnerships on audience fit, content style, and brand relevance to support campaign recommendations.
- Created 50 digital marketing, presentation, and editorial materials, translating research into consumer-focused messaging.

Student Reporter

The Korea Daily

Jul 2022 – Dec 2022

Remote (U.S.)

- Researched and wrote 10 articles on topics relevant to Korean and Korean-American college students in the United States.
- Conducted interviews and gathered information from multiple sources; highest-performing article received 20,000+ views.

Editorial Intern

May Tree Company

Jul 2021 – Dec 2021

Seoul, South Korea

- Conducted keyword, competitor, and market research to identify audience trends and inform content planning.
- Created and managed digital content across 3 websites, 5 Instagram accounts, and 7 blogs to support brand communication and engagement.

PROJECTS

Higher Education Outcomes Analysis

R | College Scorecard | Regression

Fall 2026

- Cleaned and prepared institution-level College Scorecard data and conducted exploratory, correlation, and missing-value analyses.
- Built preliminary regression models to examine relationships among college completion, cost, financial aid, selectivity, and post-graduation earnings.

Spotify Music Graph Analysis

Python | Neo4j | Cypher | Graph Database

Spring 2026

- Cleaned and restructured music data for Neo4j and modeled relationships connecting tracks, artists, albums, and genres.
- Wrote Cypher queries to explore music-network relationships and evaluated query performance through repeated runtime testing.

Pepsi and Coca-Cola Stock Price and Public Sentiment Analysis

Python | Sentiment Analysis | Data Visualization

Fall 2025

- Collected and prepared social-media sentiment data for Coca-Cola and Pepsi, using Python to analyze changes in public sentiment over time.
- Built Streamlit visualizations comparing sentiment patterns with stock-price trends to explore relationships between public opinion and market movements.

Global Beauty Spending Analysis

R | R Shiny | ggplot2

Summer 2025

- Integrated socioeconomic and beauty-consumption data across 50 countries, including GDP, gender inequality, and female labor-force participation indicators.
- Built an interactive R Shiny dashboard with ggplot2 to visualize cross-country patterns and relationships between socioeconomic factors and beauty consumption.
