SUMMARY

Korean-English bilingual Data Science graduate who builds accurate, repeatable reports from messy data using Python, SQL, R, and Excel. Experienced in reconciling record counts, flagging missing data, and explaining results to non-technical teams. Seeking analyst and planning roles in business, operations, and supply chain.

EDUCATION

Dec 2026 — **The George Washington University** | Washington, D.C.
B.S. in Data Science and Political Science (Double Major)
Coursework: Data Mining, Data Visualization, Data Warehousing, Python, Mathematical Statistics

Jun 2023 – Aug 2023 — **Korea University**, International Summer Campus (Visiting Student) | Seoul, South Korea

PROJECTS

Fall 2026 — **Higher Education Outcomes Analysis (Capstone)** | R, Python, SQLite, Excel
- Modeled how cost, aid, and selectivity relate to completion and earnings in R (R^2 0.48, 0.51); found higher cost linked to better outcomes and higher Pell Grant share to worse, checked with cross-validated Lasso and PCA.
- Audited 6,273 institution records in Python and SQLite for duplicates, missing values, and inclusion rules; reproduced all four model-sample counts.
- Built a 4-sheet Excel validation report (openpyxl) cross-checking sample counts, summaries, and missing data.

Spring 2026 — **Spotify Music Graph Analysis** | Python, Neo4j, Cypher (Team)
- Led most of the data preparation, fixing duplicate IDs and multi-artist fields before loading into Neo4j.
- Modeled 4 entity and 3 relationship types; wrote Cypher for 7 analysis tasks and timed each over 10 runs.

Fall 2025 — **Coca-Cola and Pepsi Sentiment Analysis** | Python, Streamlit (Team)
- Wrote Python sentiment scripts on social-media data and built Streamlit dashboards that let users compare opinion trends with stock prices for both brands in one view.

Summer 2025 — **Global Beauty Spending Analysis** | R, R Shiny, ggplot2
- Merged economic, gender-equality, and spending data for 50 countries into an R Shiny dashboard; showed richer countries spend more per person while poorer ones spend a larger share of income.

EXPERIENCE

Jun 2026 – Aug 2026 — **Marketing Associate Intern**
Lono Inc. | Seoul, South Korea (Hybrid)
- Researched 30 competitor skincare products and summarized trends, target audiences, and positioning opportunities.
- Evaluated 10 potential influencer partners on audience fit, content style, and brand relevance.
- Translated 50 marketing, presentation, and editorial materials from Korean to English.

Jul 2022 – Dec 2022 — **Student Reporter**
The Korea Daily | Remote (U.S.)
- Wrote 10 interview-based articles averaging 500–1,000 views each; top article reached 20,000+ views.

Jul 2021 – Dec 2021 — **Editorial Intern**
May Tree Company | Seoul, South Korea
- Planned content for 3 websites, 5 Instagram accounts, and 7 blogs using keyword and competitor research.

SKILLS

Programming	Python, R, SQL, Cypher; SQLite, Neo4j
Excel	XLOOKUP, SUMIFS, PivotTables, automated reports (openpyxl)
Visualization	ggplot2, R Shiny, Streamlit
Methods	Data cleaning and validation, regression, Lasso, PCA, market research
Work Auth.	F-1 OPT; eligible for STEM OPT extension
Languages	Korean (native), English (fluent)
Military	Completed mandatory military service, Republic of Korea (2024–2025)
